Comfortable and simple installation and update process

Visit the web page: www.sygic.com/updates to get more information about Sygic Update Assistant. You can download the software or contact Sygic Customer Care team for getting support.

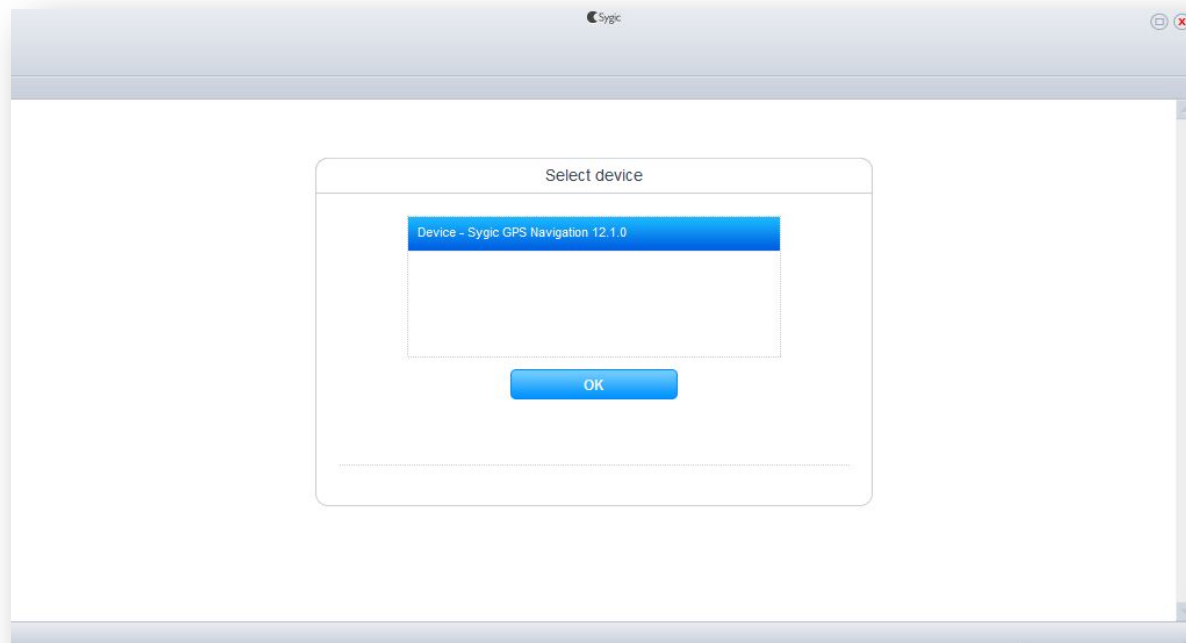

The screenshot shows a web browser window displaying the Sygic Update Assistant page. The browser's address bar shows the URL <http://www.sygic.com/updates/>. The page features the Sygic logo at the top left, followed by the text "Sygic Update Assistant" in the center. Below the title, there are three images of Sygic navigation devices: a small handheld device, a larger in-dash unit, and a tablet. Underneath these images, a paragraph of text reads: "Sygic Update Assistant is a specially designed tool which provides the possibility for end users to keep their maps always up-to-date. You can update your current maps, buy new regions or temporary uninstall maps you do not currently need. You can restore them later to save space on your device." At the bottom of the page, there are two buttons: a blue "Download" button and a white "Support" button. A small footer note at the very bottom states: "Map and content updater for not connected PNDs, tablets and In-Dash devices".

Let's start to use Sygic Update Assistant software.

First of all, insert the map storage card to the card reader – if car navigation, or connect the device if hand held.

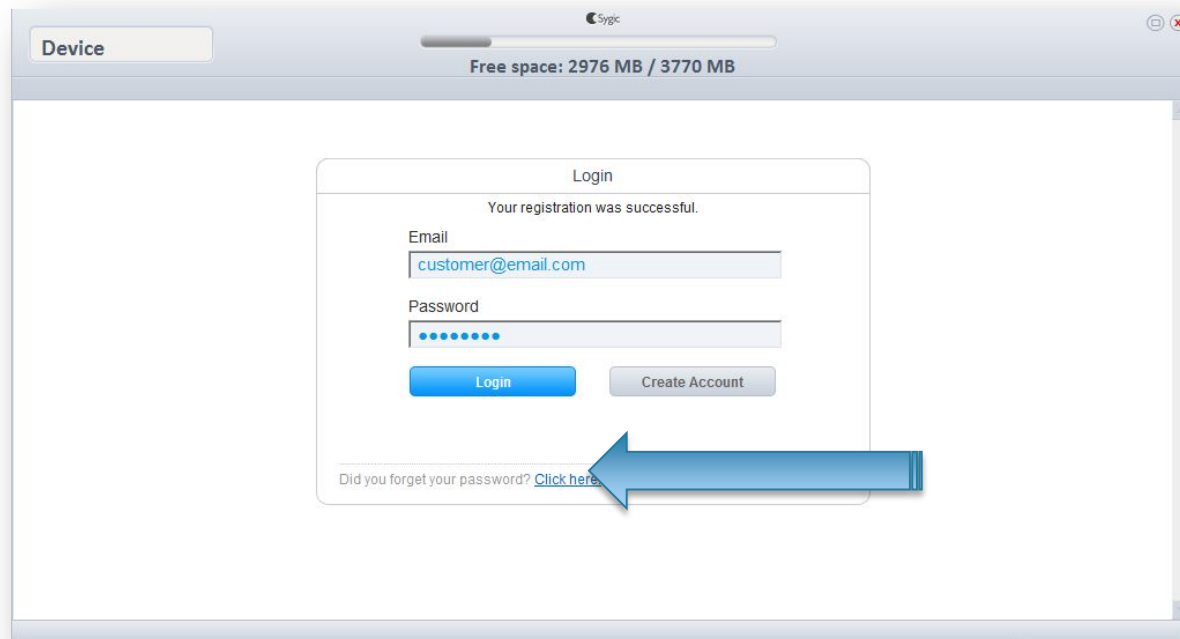

SUA will run automatically. Then select your device you want to update.

Log in to your account.

Use your existing account or if you don't have an account yet, you can create it by clicking on "Create new account" button.

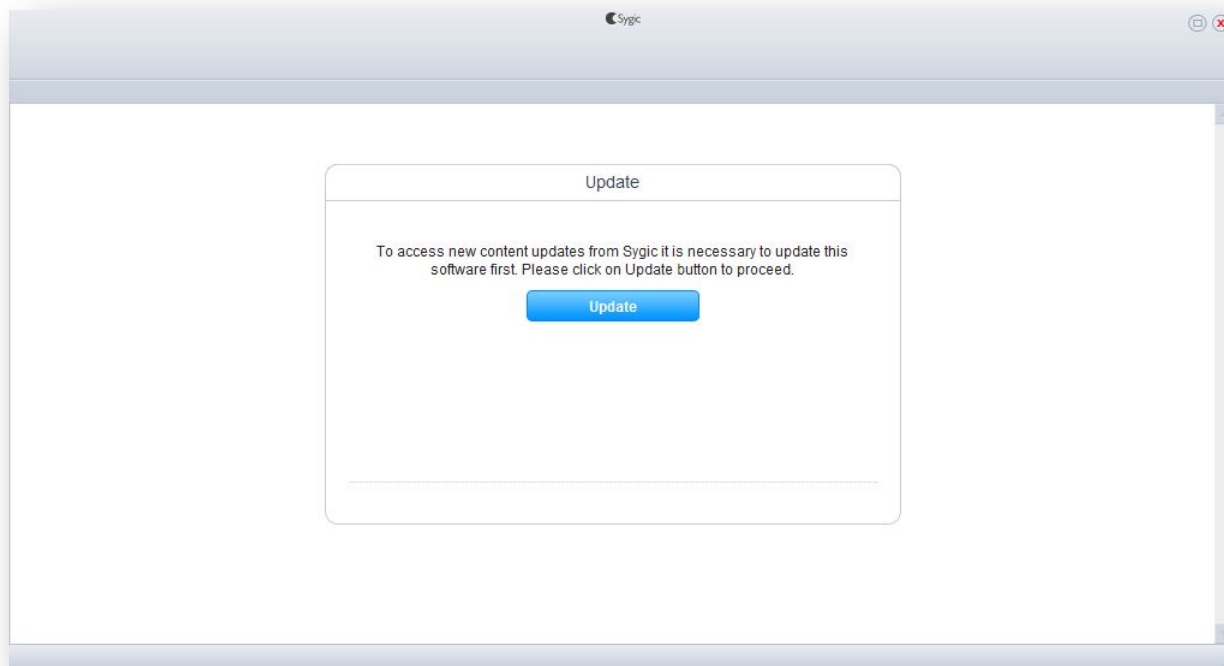

In case you forgot your password, just click on the "Click here" button to get your new password.

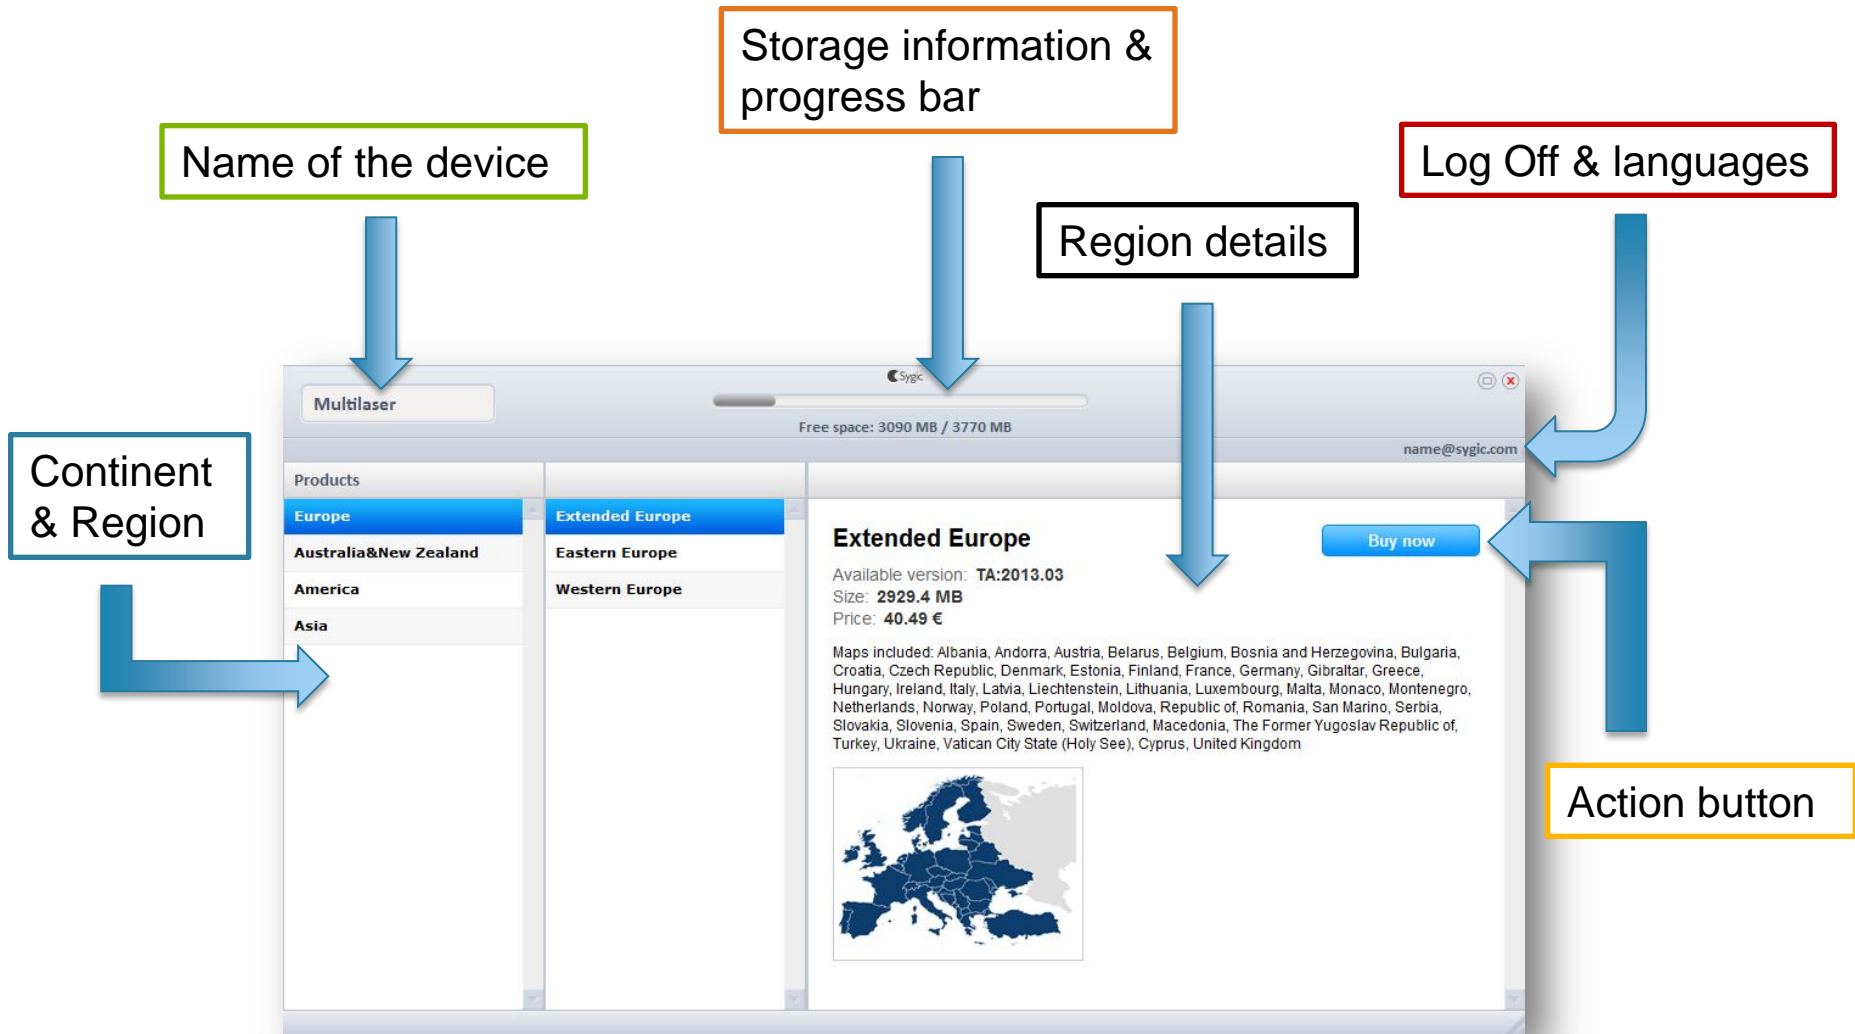

Self-update

In case you are using older version of SUA, application will offer new version for update automatically.

After Software update you will be allowed to update maps.

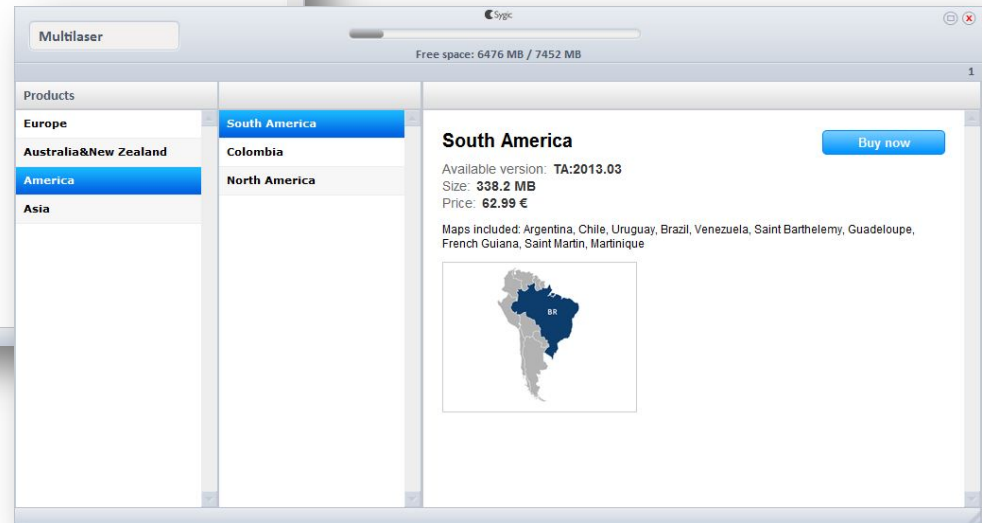

Introducing the Sygic Update Assistant application

How to get the map updates:

1. Select continent and region you want to update or buy
2. Check the map details and update the map.
3. Map update options are available:
 - **Free download (pre-purchased updates)**
 - **Buy now option**

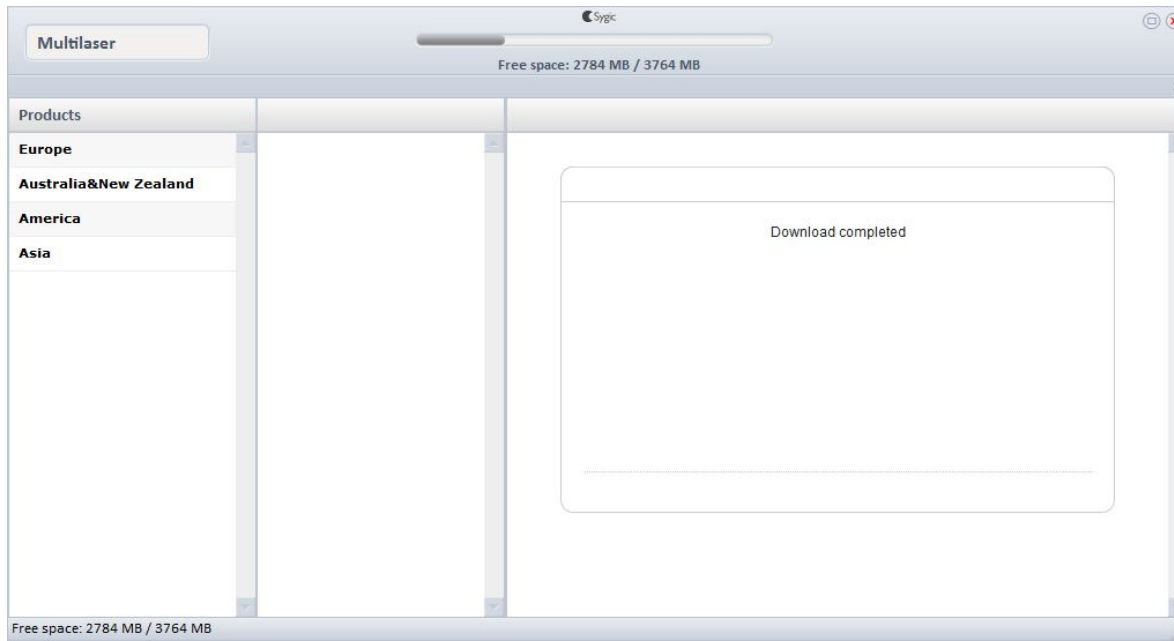

Managing your purchased maps.

Manage your maps by selecting :

- Select All
- Unselect All
- One or more countries

Then select **“Process”** button to install selected new maps and uninstall maps that have been selected and already installed previously. You will see the confirmation message after successful execution.

You can see the maps details on the right side:

- Size of the map
- Status:
 - Available
 - Installed
 - Uninstalled

Map updates FAQ

- Are map updates for free?
 - Not for in car navigation. Sygic fees apply. Some updates are free depending on the hand held device.
- How many times are maps updated?
 - All maps are usually updated twice a year.
- Are these updates lifetime?
 - User can purchase the update for particular map release, after the new maps will be available in SUA, user will need to buy new version to get newest map updates.
- I cannot use the SUA, still waiting for connecting the device.
 - First you can check SD card or USB connection. Then check the requirements for SUA. Most of cases cannot use SUA because the software is lower than v8.32. In that case you need to contact your hardware supplier to get software updates first.
- In case of some issues with the updates, what should I do?
 - Contact our support center: <http://help.sygic.com/home>

Get the newest maps from all over the world easily.

In case of some questions please contact the Sygic support team, not the supplier of the device:
